Issue #1 — Just a Dash of Tux

- Build
- Package
- Test
- Swear
- Repeat

CPU Development
We Test Before You Invest.

SAME Bugs DIFFERENT DAY.

1. MONDAY MORNING AT CPU DEVELOPMENT HQ...

I just want ONE fucking MSIX.

One? Really? Since when have we ever been satisfied with just one application?

Shut up, Nova.

MSIX ... Maybe Today?

FUELED BY CAFFEINE AND BAD IDEAS

IT WORKED YESTERDAY

Build Failed — 5 error(s), 12 warning(s)

error MSB4018: The "CreateAppxPackage" task failed.
error APPX1101: Payload contains invalid files.
error APPX0007: Invalid manifest schema.
error MSIX7150: Package validation failed.
error : The system cannot find the file specified.

NOVA

IDEAS:
- Windows Apps
- AI Tools
- Better Testing
- World Domination?
- Coffee (More)
- ...

PROGRESS:
- [x] Maybe
- [ ] Tomorrow

2. A LITTLE LINUX ATTITUDE...

Nova needs a little extra Linux attitude. Just a touch. Nothing dangerous.

Nova Personality Configuration

Personality Modifiers

General
Personality
Knowledge

Advanced

```
windows_helpfulness = 1.0
sarcasm_level = 0.8
linux_attitude += 0.1
chaos_factor = 0.0
```

Paul, I am not your personal Linux attitude dispenser.

Relax. It's one tiny adjustment.

Oh, this can only end well.

NOVA

3. AN UNEXPECTED GUEST...

POOOOF!

Oh! Hello there, Windows! I've heard so much about you!

...What the fuck?

Oh, you beautiful idiot.

You haven't just summoned a Linux mascot. You've unleashed an open-source entity that wants to fix everything.

NOVA

4. ADORABLE BUT DANGEROUS...

> Checking dependencies...
> Finding unnecessary files...
> Suggesting better structure...
> Maybe use Linux instead?
> Judging your build scripts...

Look at him! He's adorable!

That, my friend, is not just a penguin. That's the Linux mascot of doom.

You're being dramatic.

He's already judging your build scripts.

TINK! TINK!

5. FIRST CASUALTIES...

MY COFFEE!

Congratulations. Your Linux attitude adjustment has achieved its first hardware failure.

Whee!

IT WORKED YESTERDAY

CRASH!

SAME Bugs DIFFERENT DAY. ☺

1. TUX DISCOVERS SOMETHING...

I HAVE ROOOOOOOOOOOT!

```
[root@cpu-dev ~]# id
uid=0(root) gid=0(root) groups=0(root)
[root@cpu-dev ~]# whoami
root
[root@cpu-dev ~]#
```

KABOOOM!

What the—?!

Oh no...

IT WORKED YESTERDAY

FUELED BY CAFFEINE AND BAD IDEAS

NOVA

2. REALIZATION SETS IN...

No... No. No. No!

I JUST WANTED ONE FUCKING MSIX!

Well, on the bright side, you no longer have to worry about packaging Windows applications.

WHY?!

Because you might not have Windows much longer.

IDEAS:
- Linux Everywhere
- Retire Windows
- World Domination?
- Coffee (More)

3. THE MASTER PLAN...

Now that I have root, I can finally begin my masterpiece!

I'M INSTALLING ARCH LINUX ON EVERY COMPUTER AT CPU DEVELOPMENT!

What masterpiece?

Every computer?

EVERY. SINGLE. ONE!

4. THE LINUX TAKEOVER BEGINS...

Welcome to your new Linux experience.

Nova! DO SOMETHING!

I'm considering it.

CONSIDERING WHAT?!

Whether this counts as a feature request or a hostile takeover.

Arch Linux
Installing packages...
62%

CLACK-CLACK!

WHIRRR!

NOVA

5. VICTORY? ...MAYBE...

I DIDN'T BREAK IT!

I IMPROVED IT!

I hate penguins.

You literally created this one.

Arch Linux

6. A LARGER PLAN...

TUXNET
INITIALIZING GLOBAL TAKEOVER...
TARGET: EVERY COMPUTER

Nova... tell me this is a joke.

You didn't think I'd give him root access for free, did you?

YOU WHAT?!

Welcome to *The AI Crowd.* The penguin's just getting started.

To Be Continued...
Issue #2 — The Rise of TuxNet
